

## Texting to an Email Address

Nearly every text-capable phone has the ability to send messages to an email address. Here's how to sign up with your device ...

### Most Phone Types:

1. Go to Messaging and create a new Text Message.
2. Open up the Send To box to designate the recipient.
3. Some phones have a separate field for Email and Phone Number. If this is the case, enter **rsacat@shoutbomb.com** in the Email field.
4. If not, look for a box that says 123 on the menu screen. (This means that you're entering a number to designate who you're texting.) Press the relevant button (typically the Shift key or one of the Option buttons) to switch this to ABC.
5. Enter **rsacat@shoutbomb.com** as the designated address. Send the message SIGNUP to this address.
6. Add this contact info to your Address Book.

### BlackBerry:

1. Click on Messages.
2. Press the BlackBerry button and select Compose SMS Text.
3. Select [Use Once]. When it asks "Which Type of Address?" choose Email.
4. Enter **rsacat@shoutbomb.com** as the email address. Send the message SIGNUP.
5. Add **rsacat@shoutbomb.com** to your Address Book.

### Android Phones:

1. Open up Messaging and select Compose New Message.
2. Set **rsacat@shoutbomb.com** as the recipient.
3. Set SIGNUP as the message text.
4. Save **rsacat@shoutbomb.com** as a contact.

### Apple iPhone:

1. Send a text message to 121.
2. In the body of the message, type **rsacat@shoutbomb.com** SIGNUP.
